

FOR IMMEDIATE RELEASE:

May 31, 2010

KEY GOLD TARGETS TO BE EVALUATED AS FIELD SEASON COMMENCES

Tri Origin Exploration Ltd. (TOE: TSX.V) ("Tri Origin" or the "Company") is pleased to announce that the 2010 field season has commenced and a field crew has been sent to the Company's strategic land position at its Red Lake Extension ("RLX") property at Red Lake, Ontario to sample survey and prioritize drill targets. Upon completion of target evaluation at RLX, Tri Origin's field crew will be dispatched to the Company's recently acquired gold exploration property at Sky Lake located approximately 250 kilometers to the east of RLX, to explore and prioritize new, prospective drill targets. The targets at RLX and Sky Lake will be further evaluated by diamond drilling programs expected to commence in early fall 2010.

RLX is a gold exploration project comprised of approximately 121 square kilometres located at the southeast part of the Red Lake Gold Mining District and 15 kilometres southeast of Goldcorp's Red Lake mine. The highly prolific Red Lake District hosts several major, operating and past-producing gold mines and has produced over 20 million ounces of gold. The Company's work continues to validate its hypothesis that RLX is underlain by the important mine trend rock units that host the nearby Red Lake gold mines.

The Sky Lake gold property consists of 20 claims 100%-owned totalling 50 square kilometres located 35 kilometres southwest of Pickle Lake in north-western Ontario. The property covers part of an extensive and well-mineralized greenstone belt and lies midway between the past-producing gold deposits of the 2 million ounce Pickle Lake Gold District to the northeast and the Golden Patricia gold mine to the west.

In other news, Tri Origin has filed its fiscal third quarter Financial Statements and related Management's Discussion and Analysis for the period ended March 31, 2010. For further information, please refer to the Company's website www.triorigin.com or SEDAR www.sedar.com or contact:
