

## GOLD AND BASE METAL EXPLORATION IN THE CANADIAN SHIELD

### What Makes Tri Origin Stand Out?

- ✓ Tri Origin is a well-recognized & respected mineral exploration company with a long-standing track record in Canada, Nevada & Australia
- ✓ Management has discovered & developed large gold deposits
- ✓ The board has broad mining industry experience & background encompassing capital markets, ore deposit discovery, mine development & financing as well as corporate, social & environmental responsibility
- ✓ A portfolio of Top Tier, district-scale exploration projects has been assembled in the Canadian Shield
- ✓ The Company has spent many millions of dollars to delineate advanced-stage drill targets at gold zones
- ✓ Resource delineation through drilling is the Company's objective

#### DIRECTORS & MANAGEMENT

##### *Directors;*

**Robert Valliant, PhD-** CEO– Uxbridge, ON

**J.P. Janson-** Montreal, QC

**Mark Petersen MSc, MBA-** Oakville, ON

**Glenn Nolan-** Atikokan, ON

**Jerry Blackwell-** Lion's Bay, BC

##### *Advisors;*

**Alan G Galley, PhD-** Geotechnical

**Bill Holter-** Corporate & Financial

**“An outstanding investment opportunity in an undervalued, leading gold exploration company with drill-ready projects positioned for resource delineation”**

## TOP TIER EXPLORATION PROJECTS

### Sky Lake (Gold)

- ✓ Koval gold deposit discovered & partially delineated in the 1950's (over 60 years ago!!)
- ✓ A non-compliant gold resource was calculated in the 1980's and the deposit is open and requires drilling to confirm & expand the known resource
- ✓ No exploration conducted for over 30 years
- ✓ Pickle Lake Mining District within the Birch-Uchi Subprovince- host to over 40 million ounces of gold
- ✓ 100% owned mining claims covering 124 square kms with an option to acquire patent mining claims covering 3 square kms
- ✓ Historic drilling at Koval totals 14,000 metres in 132 holes- millions of dollars of data has been compiled
- ✓ Tri Origin has expended over \$1.5 million to delineate new targets near Koval through geological, geophysical & geochemical surveying

### Nipissing Cobalt & South Abitibi (diamonds, gold, base metals, cobalt)

- ✓ De Beers Canada Inc has entered into 1 year diamond exploration access agreements on both properties to conduct & fund preliminary exploration at targets it has identified as possible kimberlite
- ✓ If results warrant, De Beers may enter into earn-in option agreements to conduct detailed evaluations to earn interest in either of the properties
- ✓ Nipissing Cobalt- 100% owned mining claims covering 125 square kms
- ✓ South Abitibi- 100% owned mining claims covering 210 square kms
- ✓ The properties also host prospective occurrences of cobalt, silver, gold, copper & nickel that warrant further work
- ✓ Tri Origin has conducted exploration with expenditures of \$2.4 million on the properties and has compiled a large historic database

### North Abitibi (Gold)

- ✓ Gold zones discovered on the property have been traced by shallow drilling for 3 kms in length
- ✓ Zones are open and require deeper drilling to evaluate their economic significance below the level of earlier drilling
- ✓ Within the Abitibi greenstone belt host to over 250 million ounces of gold production
- ✓ 100% owned mining claims covering 50 square kms
- ✓ Historic drilling at North Abitibi totals 29,600 metres in 139 holes and millions of dollars of exploration data has been compiled
- ✓ Tri Origin has expended over \$1.6 million to delineate new targets and depth extensions of the as yet, sub-economic gold zones
